

20 off

your next job of \$200 or more worth of work!

This coupon can not be used in conjunction with any other coupon, promotional ad, sale, or discount any kind.

To trim a tree there are a few variables to consider:

1st What type of trimming is going to be done?

Lift Cutting – Structure Cutting – Thinning – Resizing/Topping – Removal
This will determine how much debris will be cleared out and hauled away.

2nd The location of the tree.

Is the tree towering over structures (homes, garage, items that can't be moved).
The more that specialized equipment is needed, the more the cost will be effected.

3rd Accessibility for the crew to do the job.

The harder and/or further away the tree is, converts into more labor hours needed.
